- C# Developer
- Junior Software Developer
- HTML/CSS/JAVASCRIPT
- .lua code fixer
- Web Developer
- Team Worker
- Debugging & Troubleshooting

LANGUAGES

- Albanian – Native / Fluent
- English – Fluent

PROFILE

Hello, I am Diar Azemi I am a motivated 15 year-old aspiring software developer currently studying programming at The British School of Kosovo. I like programming because it is a way that I can do everything and it is a difficult way that requires work. I took the initiative to look at the website and found errors that I could not understand and I started to learn programming, I motivated myself and this year, prof. Rilind Muharremi. I think that what brought me to programming is a big project that is a web app that is used for all foods, drinks, all food items that we need, just from restaurants to put them in the web app and with every worker that they send across the country who do not have to eat or drink anything. With over two years of experience in FiveM development, I specialize in debugging, troubleshooting, and maintaining systems written in Lua, JavaScript, and C#. I have hands-on experience designing and developing websites using WordPress, along with foundational knowledge of Archicad. My expertise includes improving existing codebases, fixing bugs, and enhancing both UI and backend functionality for multiplayer game environments and web-based tools. I am a certified developer with credentials from FreeCodeCamp and Microsoft, and I am currently completing my Full Stack Developer certification, expected in December 2025. Alongside my studies, I am self-employed, gaining practical experience through freelance projects. Passionate about continuous learning, I am eager to contribute my skills to real-world projects in software development and web design. Sincerely, Diar Azemi.

WORK EXPERIENCE

Self - Employed

- Software Developer - Web Developer 2025 - PRESENT
- Software Developer - Web Developer
 - Design, develop, and deploy innovative web applications and digital projects from concept to completion.
 - Create interactive and engaging experiences, including games and custom tools, demonstrating strong problem-solving and coding skills.
 - Ensure code quality, maintainability, and responsiveness across multiple platforms and devices.

The British School Kosova

- C# Project OrderManagementSystem 2024 - 2025
- Developed a complete C# console application for restaurant order management with features including adding, editing, deleting, and searching orders.
 - Implemented secure admin login with password hashing and CSV export functionality to enhance data portability.
 - Calculated total revenue and streamlined order tracking.
